Office Action Summary	Application No. 10/560,007	Applicant(s) HUITEMA ET AL.	
	Examiner Ernest F. Karlsen	Art Unit 2829	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith.

With regard to claim 1, Smith shows a display having an indicator giving early warning of imminent display failure. See the abstract, column 5, line 57 to column 6, line 8, claim 19 and claim 22. With regard to claim 2, the above quoted material also includes the feature of comparison. With regard to claim 3, “imminent” is considered to relate to remaining lifetime and is representative of “very little”. With regard to claims 4-8, the test of Smith includes capacitive measurement and responds to conductor line width which is a mechanical feature that has electrical ramifications. The conductors are connected to thin film transistors. See all of columns 5 and 6 of Smith. Column 7, line 1 indicates that current is compared over time. With regard to claim 9, anything made by the hand of man is replaceable, as are the parts of Smith. The limitations of claims 10-12 are inherent features of the apparatus of Smith.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2829

Claim 1 is further rejected under 35 U.S.C. 102(b) as being fully anticipated by Strobel, cited by Applicant.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakajima, see column 1, lines 56-65 and Burke et al , column 5, line 63 to column 6, line 14 and column 7, lines 29 to 59 are cited to show additional apparatus similar to that of Smith.

Any inquiry concerning this communication should be directed to Ernest F. Karlsen at telephone number 571-272-1961.
